PROFESSIONAL EXPERIENCE

KWnetic

Freelance Frontend Software Engineer

Remote

November 2021 - Present

- Developed and maintained **5+** scalable, responsive, multi-platform and SEO-friendly landing page websites for clients using **HTML5, CSS3 + BEM, JavaScript ES6+, React.js, TypeScript and SCSS**
- Implemented best practices to optimize multiple webpages' performances for a high volume of clients in a short period
- Dealt with reaching out to multiple potential clients for freelance work and made sure websites were up to their standard

Amelia – ([Website](#))

Software Engineer Intern

Toronto, ON, Canada

May 2022 - July 2022

- Developed maintainable and testable code in a mobile and web application used by **over 10,000 users** in Canada
- Shipped new product features using the **React Native framework** across iOS and Android applications tested with **Jest**
- Managed the lifecycle of the mobile and web application development using **CI/CD deployment processes**
- Collaborated with the Tech Lead, other interns, UI/UX designers, and the founders in a **scrum agile environment**

PROJECTS

Movie Database React App – “Flicks” ([View project](#)) – ([GitHub](#))

May 2022

- Designed, developed, and hosted a movie lookup app made using **HTML5, CSS3 + BEM, JavaScript and React.js**
- Implemented and executed **Axios** to **fetch data** from OMDb API **asynchronously** and displayed data as media content
- Included SEO, responsive, multi-platform, and hosting support

Social Media Clone - Twitter ([View project](#)) - ([GitHub](#))

April 2022

- Created a responsive social media web app clone using **HTML5, CSS + BEM, JavaScript, React.js, and Firebase v9**
- Stored and fetched tweets using **Firebase Cloud database**
- Utilized Twitter's API to fetch tweets and display them on the user interface with the **best UI/UX principles**

ADDITIONAL

Languages: Fluent in English, limited working proficiency in French

Interests: Gaming, lifting weights, racing with fast cars on the track
